DREER'S SUPREME HYACINTHS

Hyacinths are perfectly hardy in all parts of the United States and Canada. They come into bloom outdoors at the same time as the midseason Tulips. The bulbs must be planted in the fall to bloom the following spring. In the garden, place them with the base 5 to 6 inches below the soil level. Be sure to plant the bulbs all at the same depth as otherwise they might not flower at the same time. Beside their value for garden display they are exceedingly popular for flowering in the house. For this purpose the Mammoth or the Extra-Large bulbs should be chosen.

Narcissus — Daffodils

Medium Trumpet or Chalice Cup

The Chalice-Cup or Medium-Trumpet group of Daffodils or Narcissus includes some of the most beautiful varieties. In the Incomparabilis group the cup or crown is not less than ⅓ of the perianth petals, whereas in the Barri group the cup is less than ⅓ the length of the perianth segments. In the Leedsi group the size of the cup varies but the perianth always is white and the cup or crown is either white, cream, or has a pinkish tint. All of them are splendid for naturalizing because they are reliably hardy and they multiply more rapidly than those belonging to the Giant-Trumpet class. Those who have proper facilities will find them excellent also for growing in pots or pans. For best effect in the garden they should be planted in groups.

DREER'S GERMAN IRIS

For a Riot of Color in May and June

We have yet to plant German Iris in a place they would not grow—sun or shade; banks or terraces; moist or dry. They grow and multiply and yield a prodigious amount of bloom through May and June. Two firm rules to follow in planting are: 1. No fresh manure. 2. "Knuckles up," that is. the tops of the rhizomes (roots) should show just above the surface of the ground when planted. For fertilizer use dried sheep or cow manure or bone meal.

September or October is the best time to plant. Order now.

Angelus. 3 ft. One of the very finest orchid-pink Iris. The blooms, heavily textured, are ideally spaced on a well-branched stalk. A new self with a shimmering mauve iridescence on the falls. 60c each; 3 for $1.50; 12 for $4.75.

Buffawn. 3 ft. Buff-fawn with a brilliant tangerine beard. Pronounced flaring blooms of light tan color with a pinkish glow; prominent red-orange beard. 75c each; 3 for $2.00; 12 for $7.00.

Copper Lustre. 3 ft. Instantly distinguishable from other Iris is this large, odd and beautiful copper-toned flower overlaid with a golden iridescence. 60c each; 3 for $1.50; 12 for $4.75.

Destiny. 3 ft. A rich, somber-toned variety with exceedingly velvety black plum-purple falls and standards and rich gold beard. An effective very dark Iris. 60c each; 3 for $1.50; 12 for $4.75.

Elmohr. 3 ft. One of the most exciting and talked-of Iris we have grown in years. An exquisite shade of rich, reddish mulberry, incredibly glossy and lustrous; the color seems to smolder as if some interior source of light were seeping out. $1.25 each; 3 for $3.00.

Elsa Sass. 3 ft. Enticing "lemon-ice" toned yellow, an entirely new shade. Cool and frost-like sulphur-yellow with a white blaze near the haft. Elongated blooms of medium size, frilled at the edges. 60c each; 3 for $1.50; 12 for $4.75.

Garden Magic. 3 ft. A top-flight red. Flowers of smooth, velvety-toned vivid red on medium tall stems. Rich color, good substance and form. Not a fast grower, it takes about two years to give its best performance. $1.00 each; 3 for $2.75.

Golden Majesty. 3 ft. A very fine golden yellow, glistening smooth and unfading. The good-sized, gleaming gold blooms are of majestic classic form. 75c each; 3 for $2.00; 12 for $7.00.

Great Lakes. 3 ft. Winner of the Dykes Medal in 1942, this is about the finest light pure blue. Of good size and form, with a pronounced flare and stiff, crisp petal texture, it is most striking. Rugged and hardy, we highly recommend it. $1.00 each; 3 for $2.75.

Gudrun. 2½ ft. A splendid white for fore-ground planting. A very large variety with shapely blooms of excellent texture. Warm white despite its snowy coloring, due in part to the warm golden beard. 60c each; 3 for $1.50; 12 for $4.75.

Lighthouse. 3 ft. A most unusual coalition of colors—clear old-rose standards and rose-red falls. A torch-like center of yellow sends streams of gold from the heart of the flower. 75c each; 3 for $2.00.

Miss California. 3½ ft. An enormous flower of lilac-pink, a pleasing tone, with a lemon-yellow beard. A prolific variety and a most satisfactory garden subject. 60c each; 3 for $1.50; 12 for $4.75.

Missouri. 3 ft. The giant blooms of faultless form and heavy enameled texture are a clear rich shade of medium blue. In every way a splendid Iris. 60c each; 3 for $1.50; 12 for $4.75.

Snow Flurry. 3½ ft. A beautiful, ruffled blue-white, like an enveloping soft snow spray. The unopened buds are lightly tinted blue, but the blossoms open a cool white. $1.50 each; 3 for $4.00.

DREER'S WORLD-FAMOUS ROSES

For Fall Planting

Fall is one of the better times to plant Roses. The fall shows no such vagaries of weather as experienced in early spring. Unusually late springs mean that Roses cannot be planted until late April, by which time fall planted roses will have made considerable new growth.

Roses planted in November are all set to grow at the first sign of spring.

Everblooming Hybrid-Tea Roses

Strong, Budded, 2-Year-Old, Field-Grown, Dormant Plants

The list of Roses offered has been carefully selected to give our customers a wide selection of colors and types.

You will find the newest of the new as well as many old time favorites. All are perfectly hardy and if properly cared for will give you bloom from late spring until late fall.

Roses will be shipped in early November and we advise early preparation of the beds so that there will be no delay in planting once they are received. Roses will be shipped by Express, charges collect. If wanted by Parcel Post add Postage.

DREER'S WORLD-FAMOUS ROSES

ROSETTE ROSES

Enchantingly Beautiful

A single stem of Crimson Rosette

Two sensational New Roses. Not just a new color, but a new type. Strong bushy plants, practically mildew proof and quite resistant to Black Spot. Flowers are larger than the small flowered Polyanthas and slightly smaller than the Floribunda type. They will be designated as Rosette Roses. Developed primarily for forcing, they are at the same time ideal for garden Roses. Plants "break" freely and continuously and consequently are seldom without flowers.

Pink Rosette. (Plant Patent Applied for.) Typically the Rosette type with dainty Camellia-like flowers of the most delightful shade of pink. Flowers last almost as long when cut as they do on the bush. $1.50 each.

Crimson Rosette. (Plant Patent Applied for.) The striking crimson scarlet of these lovely blooms is enhanced by the deep glossy green of the foliage. Flowers are full double and borne 5 or 6 to a truss. If the terminal bud is removed all remaining buds will open at the same time. Ideal for cutting. $1.50 each.

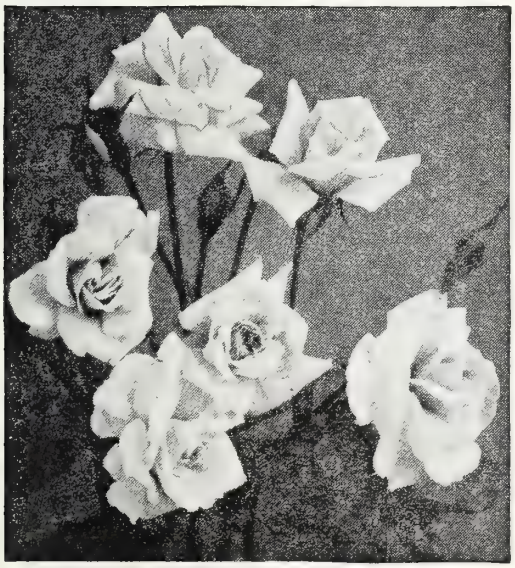
SHRUB ROSES

Lipstick. Vigorous plants of splendid Shrub habit producing showy large flower clusters all season long. The individual blooms are of medium size, single, and of a clear cerise with salmon shadings. The yellow stamens add considerably to the beauty of the flowers. $1.25 each.

Ming Toy. (Plant Patent Applied for.) A delightful Shrub Rose. Plants are very vigorous and bushy. Small, full double blooms of deep rose-pink borne in graceful clusters. Quite fragrant and a profuse bloomer. $1.50 each.

Floribunda Roses

These Floribunda Roses represent a very important class for garden planting yet they also are excellent for cutting. Unlike the Hybrid Tea Roses the flowers are borne in showy large clusters which give them their superb display value. In addition they bloom without interruption from early summer until hard frost arrives in late fall. They are easy to grow and exceptionally winter hardy.



White Finch

Rosenelfe

Improved Lafayette. Brilliant flowers of medium size borne most abundantly on sturdy plants. The deep glowing red blooms are vividly suffused with crimson and large clusters of them give an impressive garden display. Also very fine for cutting. $1.25 each.

Rosenelfe. We know that you will be delighted with this extra free-blooming Floribunda Rose. The Gardenia like flowers are a glowing shade of pink with a silvery reflex. They are extremely double and are borne freely all summer long. Excellent for massing. $1.25 each.

White Finch. (Plant Patent #277.) Strong bushy plants 2 to 4 feet tall. Charming two-inch blooms, white faintly tinted with pink. Nicely arranged trusses for cut flowers. $1.25 each.

DREER'S Glorious Peonies

Plant Early for Best Results

Peonies are one of the loveliest and most sweet-scented of flowers and, at the same time, one of the easiest to grow and care for. Peonies are not particular as to position; they grow in full sun or in partial shade where other flowers do not thrive. In fact, shade tends to make the colors more intense and to prolong the blooming season.

Enrich the soil with cow manure before planting. Do not plant too deep. Only 2 inches of soil should cover the "eyes." When the buds are about to open, give a supplemental feeding of liquid manure or Hyponex.

When ordering, make your selection for different blooming times as noted in descriptions of various varieties.

The number following the name means the rating tabulated from the votes of members of the American Peony Society throughout America and Canada. 10 is the highest possible score; none under 8 are offered.

DREER'S LAWN GRASS

Nothing will enhance the value of a property like a well-made, well-kept Lawn

Your home deserves a lawn of smooth velvety texture which will remain a deep emerald-green through the spring, summer, and fall; a lawn that will bring out all the beauties of your shrubbery, trees, and gardens, and provide the most appropriate setting for the house itself. Such a lawn is possible only by sowing the highest quality lawn mixtures that have been made according to formulas that have been tested time and time again to prove their dependability.

Planting Instructions

Fall is the natural time to reseed an old lawn or to make a new one. Seed may be sown from the first of September to the middle of November.

When reseeding scratch the bare spots as deeply as possible working in some Vigoro or other good fertilizer. Sow the seed and roll with a light weight roller.

Soil for new lawns should be worked to a depth of 5 or 6 inches and fertilizer (Vigoro) applied at the rate of 5 pounds to 100 square feet. Sow 1 pound of seed to 200 square feet and be sure to apply enough water to insure vigorous growth before cold weather starts.
